Environmental Policy Statement of Bascom-Turner Instruments, Inc.

"Bascom-Turner Instruments Inc. is committed to good environmental practices and to minimizing adverse environmental impacts of its operations. To this end, the company strives to minimize all emissions and discharges, reduce or eliminate potentially toxic materials from its operations, minimizing its waste stream by recycling whenever possible. The company monitors and audits the environmental impact of its activities and charts its yearly progress against its stated goals"

Environmental Review of Bascom-Turner Instruments, Inc.

Bascom-Turner Instruments has been designing and producing electronic instrumentation since 1980. At about 1990, the company began producing gas detectors for the gas utility industry and has specialized in this area ever since. The company's activities can be broken down into Sales, Research and Development, Sensor Production, Instrument Production, and General and Administrative.

The company has occupied a modern brick building in a suburban location (Norwood, MA, US) since 1983. The premises are fully air conditioned and encompass about forty thousand square feet.
